**Tribal Climate Adaptation Planning**

**Post Training Survey Results**
In 2016 and 2017 the Alaska Native Tribal Health Consortium and Institute for Tribal Environmental Professionals gave three tribal climate adaptation planning trainings in Alaska. We asked tribal participants to take a post training survey to understand more about climate adaptation planning.

**Participants**
81 people attended a training and 31% of them took the post-training survey.

**Most Common Reason for Attending Training**
Including climate adaptation planning in EPA Indian General Assistance Program–IGAP workplans.

**Most Helpful Aspect of Training**
Interacting with and learning from other Alaska villages.

**Recommendations for More Training**
Follow-up & regionally focused trainings, emphasis on elements of IGAP workplans.

**Climate Adaptation Planning Activities Since Training**
- Attended conference/planning session: 17
- Attended workshop: 14
- Contacted other communities: 7
- Started writing a plan: 5
- Applied for grants: 4
- No activities: 3
- Hosted community planning meeting: 3
- Used climate adaptation strategies: 2

**Plan Status**
Progress of tribes climate adaptation plan.

**Climate Change**
58% of tribes are addressing climate adaptation through EPA Tribal Environmental Plans.

**Support 4 Climate Adaptation Planning**
- Local tribal leadership: 47%
- Community: 41%
- Regional tribal non-profit & corporation: 12%
- Universities & scientist: 41%
- Tribal service organization: 38%
- Federal government: 38%
- State of Alaska: 38%
- Regional corporation: 38%
- Local tribal leadership: 47%

**Western Science**
Communities want input on understanding & applying climate information/data but common concerns:
- Data not detailed enough for planning
- Data difficult to understand
- Data for my community hard to find/access
- What do changes mean for my community?
